

Rundll32 commands for Windows for Windows 8 / 7 / Vista

Posted by

I have compiled a list of Rundll32 commands, which can be used for directly invoking the specified functions or to create shortcuts of those, which you use and require frequently.

To Create Desktop Shortcuts : Right click on desktop > New > Shortcut. In the first box of the Create Shortcut Wizard, copy-paste the desired command. Then Click Next. Give the Shortcut a Name. Finally, select an appropriate icon for it.

Some of them can prove to be rather useful, eg, copy-paste **rundll32.exe keymgr.dll,KRShowKeyMgr** in Search bar and hit enter; and you will see the **Stored User Names and Passwords Box** pop up ! The Stored User Names and Passwords Applet lets you assign user names and passwords to use, when needing to authenticate yourself, to services in domains other than the one you are currently logged into. It's normally very awkward to access it, but this way lets you do so faster ! You can thus access quite a few useful functions easily !
